

**Amendment to the Claims:**

The listing of claims will replace all prior versions, and listings of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A portable telecommunication apparatus for requesting the download of ~~respective~~ pages of ~~received~~ information from a remote source comprising:

means for receiving ~~respective~~ the pages of information including encoded information identifying ~~respective~~ links to other pages;

a display for displaying the received pages;

a fixed location input key[,]; and

a processor for consistently associating the fixed location input key with the encoded information identifying a ~~respective~~ linked page during a display period such that actuation of the fixed location input key during the display period requests the respective linked page for download from the remote source.

2. (Currently Amended) A telecommunication apparatus according to claim 1 comprising respective fixed location input keys and wherein the processor associates each fixed location input key with the encoded information identifying a ~~respective~~ linked page.

3. (Original) A telecommunication apparatus according to claim 1 wherein the display period is the duration of the display of the received page.

4. (Currently Amended) A telecommunication apparatus as claimed in claim 1 wherein the fixed location input key is a dedicated key.

5. (Original) A telecommunication apparatus as claimed in claim 4 wherein the dedicated key is one of a group of alphanumeric keys provided for dialing.

6. (Currently Amended) A telecommunication apparatus as claimed claim 1 wherein the fixed location input key is a touch-sensitive area of the display.

7. (Currently Amended) A telecommunication apparatus as claimed in claim 1 wherein a caption indicative of the linked page is provided in close proximity to the fixed location input key.

8. (Currently Amended) A telecommunication apparatus as claimed in claim 7 wherein the caption is provided immediately above the fixed location input key.

9. (Original) A telecommunication apparatus as claimed in claim 1 wherein the remote source is a computer capable of connection to the World Wide Web (WWW).

10. (Original) A telecommunication apparatus as claimed in claim 1 wherein the apparatus comprises a markup language decoder.

11. (Currently Amended) A telecommunication apparatus as claimed in claim 1 wherein the association between the ~~user-operable~~ fixed location input means ~~key~~ and the link is achieved by means of a particular tag in the page of information.

12. (Previously Presented) A telecommunication apparatus as claimed in claim 1 wherein the apparatus is mountable in a vehicle.

13. (Original) A telecommunication apparatus as claimed in claim 1 wherein the apparatus is a portable wireless telecommunication apparatus.

14. (Currently Amended) A method of requesting the download of respective pages of received information from a remote source in a portable apparatus, comprising:

receiving ~~respective~~ pages of information including encoded information identifying links to other pages~~encoded information~~;

identifying ~~respective linked other pages from the encoded information~~, the encoded information including a functional element for consistently associating operation of an identified input device with a request for download of the linked page from the remote source, and a visual element for labelling the operation;

separating the labelling and functional elements of the encoded information;

displaying the labelling information at a predefined position; and

defining the function of the identified input device using the functional element of the encoded information such that on operation of the identified input device the ~~respective linked pages~~ is-are requested for download.

15. (Cancelled) without disclaimer or prejudice.

16. (Currently Amended) A method according to claim 14 wherein the portable apparatus comprises ~~respective-fixed~~ location input keys and each fixed location input key is associated with the encoded information identifying a respective linked page.

17. (Currently Amended) A method according to claim 16 wherein the labeling information comprises a caption indicative of the linked page and the caption is provided in proximity to an associated fixed location input key.

18. (Currently Amended) A method according to claim 17 wherein the caption is provided above the associated fixed location input key.

19. (Previously Presented) A method according to claim 14 wherein the remote source is a computer capable of connection to the World Wide Web (WWW).
